# Window & Door Installation

Ensure a Proper Install Every Time

With a constant focus on quality, we understand the importance of a proper install to protect against the elements. That's why JELD-WEN partners with OSI® and recommends the OSI® QUAD® Installation System for installing JELD-WEN® windows and doors.

# JELD-WEN recommends the OSI® QUAD® Installation System for installing our windows and doors.

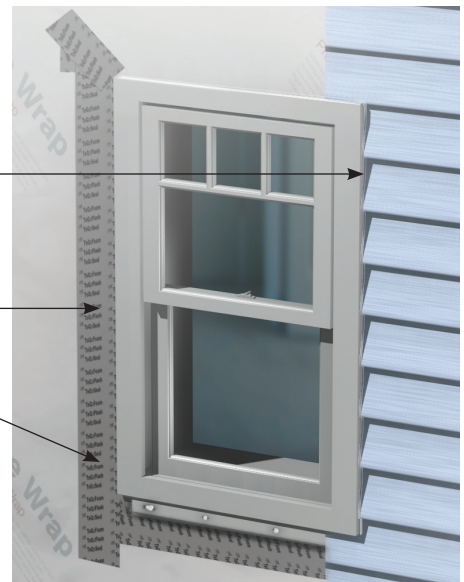

## SIMPLIFIED INSTALLATION WITH A HIGH-PERFORMANCE SYSTEM

**QUAD® MAX** is the first line of defense against air and moisture entering the home. It won't yellow, crack or collect dirt. It can be perfectly color matched to any JELD-WEN® window or door.

**QUAD® FOAM** stops air and moisture infiltration. The foam is closed-cell and flexible but will not crack. It has an insulation value of R5 per inch and an application temperature as low as 14°F.

**Flashing tape** is a high-performance membrane designed to help stop the passage of bulk water and air flow. The membrane is also vapor non-permeable and is fully compatible with the OSI® QUAD® Installation System.

**Quad® Flash** is a gun-grade waterproofing sealant compound designed for use in rough openings of structural walls. It allows for same-day installation of windows, doors and other wall assembly components and offers a strong bond to primary window, door and wall sheathing materials.

*The OSI® QUAD® Installation System protects against air and water infiltration through the rough openings in new construction and replacement applications and is backed by a 15-year limited warranty\* when installed by an OSI-certified trained installer.*

### JELD-WEN REQUIREMENTS FOR PROPER FENESTRATION INSTALLATION INCLUDE:

- Drip cap
- Square, plumb, level, winding, bow and sag requirements
- Shimmiing
- Proper fastening
- Side and back dams to sill pan and down turn leg when applicable
- Interior air and water seal
- Proper operation

Complete OSI® QUAD® Installation System can be ordered through JELD-WEN QuickQuote®

*\*Limited Warranty exclusions and limitations apply. Visit [ositough.com](http://ositough.com) for more information.*
